SUSTAINABILITY DESCRIPTION FORM INSTRUCTIONS

In recognition of the AIA Sustainable Architectural Practice Position Statement and in support of the 2030 Challenge (issued by Edward Mazria, AIA, Architecture 2030), submitted projects should reflect these energy-reduction goals where possible:

- At least 50% reduction in fossil-fuel consumption in the construction and operation of new and renovated buildings by 2010.
- Further reductions of remaining fossil-fuel consumption by 10% or more in each of the following five years.
- Carbon neutrality in the construction and operation of all buildings by 2030.

It is recommended that you use the 10 Principles for Livable Communities, created by AIA Communities by Design – design on a human scale, provide choices, encourage mixed-use development, preserve urban centers, vary transportation options, build vibrant public spaces, create a neighborhood identity, protect environmental resources, conserve landscapes and recognize that design matters.

Please describe each of the project's sustainable aspects. A portion of the juror's evaluations will be based on the sustainability of the project and how successfully it fulfilled these descriptions. Your submittal should reflect these specific points. (Limit 500 words)
